

## *Extend your Lifestyle®* Aluxor Markisolette II Cassette

### *create shade with flow*

The Aluxor Markisolette II Cassette is an elegant window awning that combines a vertical screen protection and arm extension cover. The fabric extends vertically through sturdy aluminium guiderails before the torsion spring arms pivot to extend the fabric between 90° and 158°.

The Markisolette design is a feature of European window coverings to provide both direct sunshade protection as well as allow ventilation under the screen to enter through open windows and maximise air circulation. With the Markisolette, you can enjoy shade protection without blocking out the summer airflow!

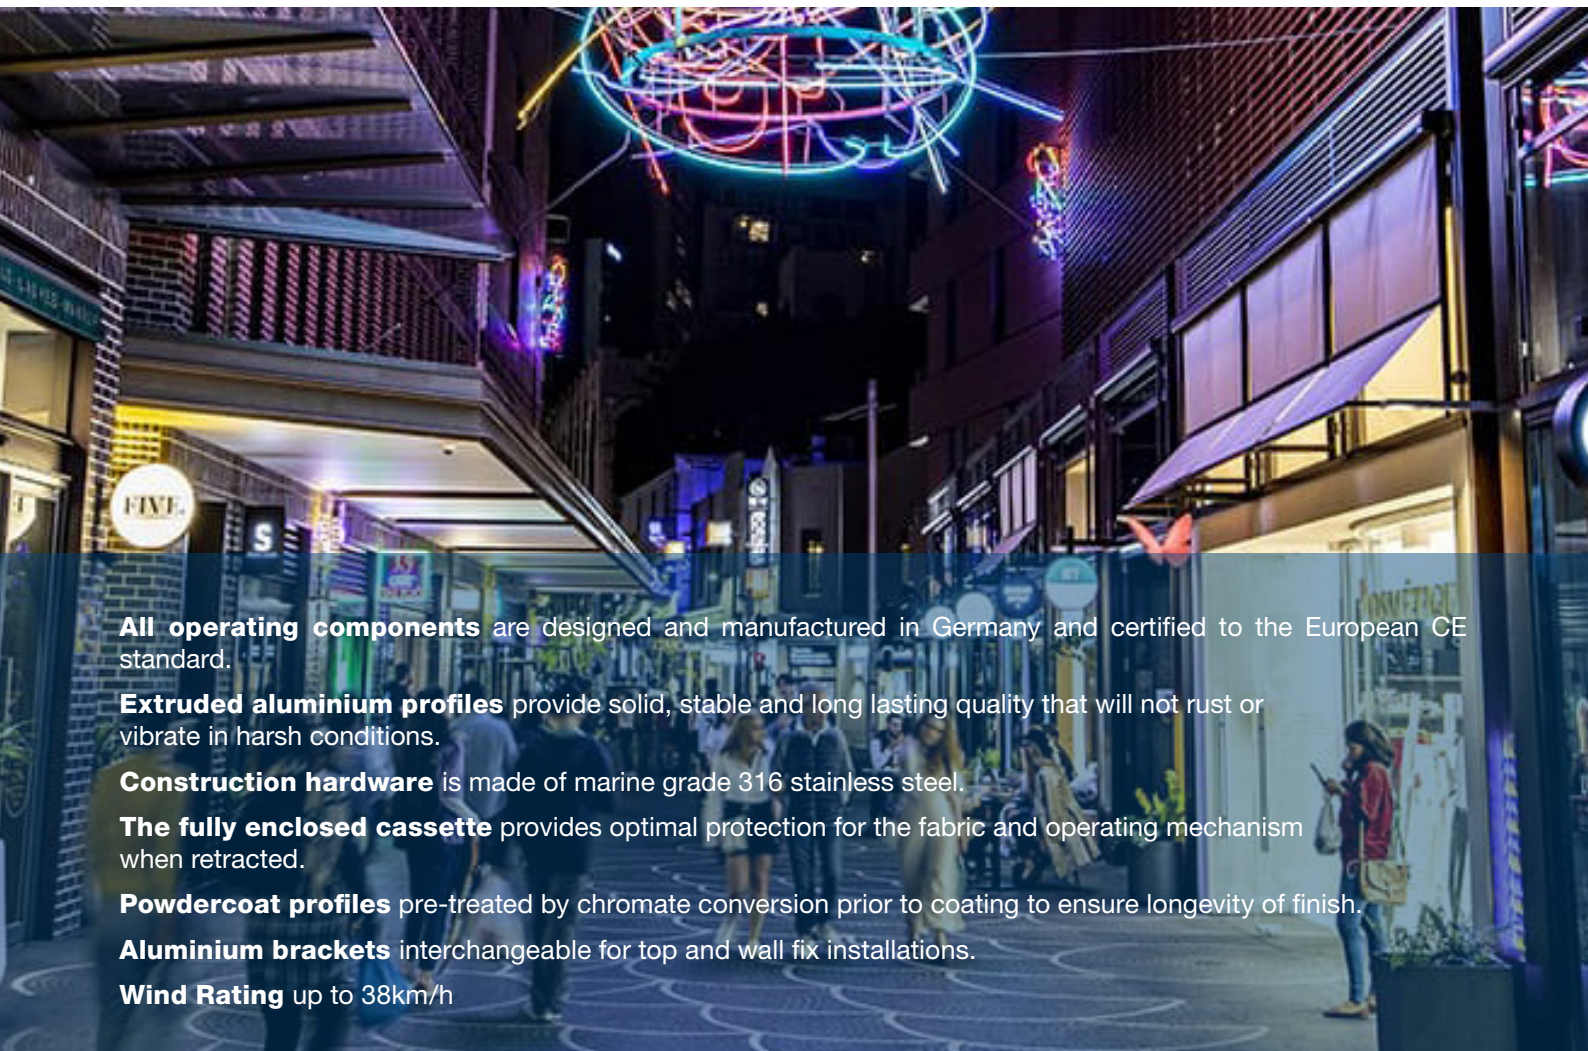

The elegant and discreet cassette is constructed from high quality extruded aluminium with the cassette size being 110mm high x 120mm depth. The single unit can be up to 3 metres wide with a drop up to 2.75m before the arms extend 0.5m. It is available as a wall mount or ceiling mount installation.

The Aluxor Markisolette II is available in 8 standard colours or in a selection of custom powdercoated colours and a variety of fabrics to complement the awning. The system can be operated manually by a crank handle, or can be motorised with optional sun and wind sensors.

Aluxor Awnings is a leading manufacturer of German precision-engineered awnings, operating in Australia for over 40 years. Aluxor awnings are built to last.

**All operating components** are designed and manufactured in Germany and certified to the European CE standard.

**Extruded aluminium profiles** provide solid, stable and long lasting quality that will not rust or vibrate in harsh conditions.

**Construction hardware** is made of marine grade 316 stainless steel.

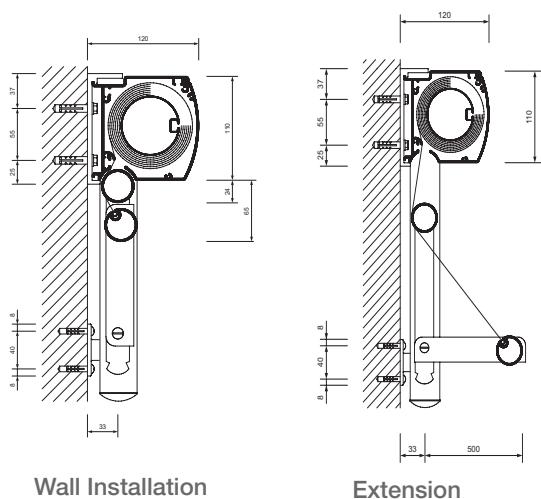

**The fully enclosed cassette** provides optimal protection for the fabric and operating mechanism when retracted.

**Powdercoat profiles** pre-treated by chromate conversion prior to coating to ensure longevity of finish.

**Aluminium brackets** interchangeable for top and wall fix installations.

**Wind Rating** up to 38km/h
