

Extend your Lifestyle®
Stratos III® Awning

create the outdoor room

Aluxor's awnings add style to any setting while providing a perfect outdoor room for entertaining, day or night.

The Stratos III is a semi cassette awning that protects against the sun or light rain as well as creating a cosy and private ambience. Ideal for patios, verandahs, balconies and restaurants, the retractable folding arm system creates a large pavilioned space free of structures and poles up to 21m width and 4m projection.

The semi cassette design protects the fabric and operating system when retracted and is an ideal awning for home or retail applications.

The awning is fitted with an extruded aluminium pelmet and metal fascia providing a long life finish to the awning. The slimline design provides a neat, compact installation and, with a large range of standard powdercoated colours, looks discreet in any setting when retracted.

The Stratos III frame and extruded aluminium fascia are available in 8 colours as standard and up to 140 customised colours.

Aluxor Awnings is a leading manufacturer of German precision engineered awnings, operating in Australia for over 40 years. Using high grade materials of uncompromising quality. Aluxor awnings are built to last.

All operating components are designed and manufactured in Germany and certified by international testing agency TÜV to the European standard 'CE Marking'.

The Secuflex 70II folding arms use tensioned, spring loaded, PVC coated triple steel cables that provide added protection against corrosion. These cables are individually hung to provide excellent wind stability and fabric tension.

The Secuflex 70II arms are able to withstand 120,000 cycles of stress, as certified by Materials Testing Authority of Germany.

Patented pivot ball front bar connector provides the best possible operational safety.

Extruded aluminium profiles for pelmets and cassettes provide solid, stable and long lasting quality that will not rust or vibrate in harsh conditions.

Construction hardware is made of marine grade 316 stainless steel.

Powdercoated galvanised steel support bars have a high durability epoxy undercoat, Pacesetter HP200, 160 microns thick to provide additional anti-corrosion protection.

Patented aluminium brackets and components with pretreated powdercoat finish.

Specifications

<i>Dimensions mm (h x d)</i>	✓	245 x 195
<i>Width single unit / coupled</i>	✓	2m – 7m / 21m maximum
<i>Projection range</i>	✓	1.5m – 4m
